The L120 Mobile Project

Valérie Demouy, Annie Eardley, Agnes Kukulska-Hulme and Rhodri Thomas
Introduction

• Languages at the Open University
  – Distance learning
  – Tutor supported
• L120 and Blended learning
  – Printed material
  – DVD-ROMs
  – Asynchronous online activities
  – Online and Face-to-face tutorials
  – Assessments (oral & written)
The project

- 2 groups of 35 students
  - Group 1: iPods or MP3 players (listening)
  - Group 2: mobile phones and Learnosity (interactive speaking activities)
- Over 6 weeks
  - 6 online questionnaires
  - audio feedback on activities for group 2
Objectives & Outcomes

• What are the contexts in which students engage in ‘mobile’ activities?
• How often do students engage in mobile activities and how long do they spend on them?
• What aspect or what type of activities do they find most or less beneficial and why?

• to evaluate the benefits of providing our students with mobile listening and speaking activities
• to understand better how to integrate interactive activities with mobile technologies into our courses
• to integrate mobile speaking activities (if appropriate) in the design of new courses
Group 1

- Type of activity
  - a variety of audio clips
  - no question or activity linked
  - reinforcement
- Participation

Participation rate - Group 1 (from questionnaires)
Group 2

- Type of activities: listening, oral presentations, pronunciation or grammar drills and dialogues
- Example
- Participation

![Participation rate - Group 2 (from questionnaires)](chart)
So where did they do it?

Group 1
Where did you listen to L120 audio clips using your device? (Tick all that apply)

- At home
- On public transport
- In your car
- Other

Week 1 Week 2 Week 3 Week 4 Week 5 Week 6

Group 2
Where did you do the L120 speaking activities using your device?

- At home
- On public transport
- In your car
- Other

Week 1 Week 2 Week 3 Week 4 Week 5 Week 6
How often and for how long?

**Group 1**
How often have you used your device to listen to L120 audio clips?

**Group 2**
How often have you used your device to do the speaking activities?
So did Group 1 find it useful?

In relation with your studies on L120, how do you rate the usefulness of listening to L120 audio clips on mobile devices?

- Extremely useful: 42.9%
- Very useful: 42.9%
- Useful: 14.3%
- Not very useful: 2.7%
- Not useful at all: 2.7%
- Don’t know: 0.7%
Which aspect did Group 1 find most useful?

In listening to the audio clips on your device, which aspect did you find most useful? Group 1 week 1

- Practising general listening skills
- Understanding and/or recognising grammatical points
- Improving vocabulary
- Helping towards intonation and pronunciation

- Practising general listening skills
- Understanding and/or recognising grammatical points
- Improving vocabulary
- Helping towards intonation and pronunciation

- Very useful
- Useful
- Fairly useful
- Not useful at all
What did Group 2 like?

- Additional practice on pronunciation and grammar provided prompts/answers were short and it did not rely too much on memory
- The challenge (being stretched) & the ‘authentic’ aspect
- The potential to complement the DVD-ROM or the other course materials
What did Group 2 not like?

• Lack of sample/model answers in the review mode
• Issues around sound quality and functionality
• The high level of difficulty:
  - relying too much on memory
  - relying too much on course material content
  - hard to understand
Reasons for dropping out

- Work/life pressure: 4
- Technical: 2
- Difficulty of content: 3
- Cost: 6
- Didn't meet expect.: 2
- Sound quality: 4
- Didn't receive info: 1
- Study pressure (L120): 7
- Functionality: 3
- No new content: 2
- Dropped out of L120: 2
**Possible practical applications**

- Encouraging the use of iPods and MP3 players for listening practise
- Standalone repetition activities (pronunciation/intonation)
- Follow-up activities (complementing other medium such as DVD-ROM) focusing on practising grammar or oral skills in general such as grammar drills, dialogues and short oral presentations
- Approaching listening differently (developing memory and comprehension as well as immediate response)
Lessons learned

• Don’t assume that even basic technology is easy to master
• Don’t forget that the sound quality so important in listening and speaking skills might be an issue on mobile phones
• Match content with the medium and its functionality (including its limitations)
• Educate the students to the potential of approaching listening and speaking skills in a less supported way. (lack of visual can help with listening skills)
