Opportunities to develop speaking and listening as the classroom have never been better. The 
Primary National Strategy firmly reinstates talk as a learning medium, with the first four 
strands of objectives relating to speaking and listening. Oracy is no longer a poor relation to 
literacy but recognised as the bedrock of 
listening. Oracy is no longer a poor relation to 
literacy but recognised as the bedrock of

Oracy: why it’s important

In his book Thought and Language, 
psychologist Lev Vygotsky described how 
thought and language go hand-in-hand. Talk not 
only shapes thinking but is also a window into 
the child’s mind. When we talk through ideas 
with each other we move our thinking forward. 

The National Curriculum places emphasis on the 
importance of thinking skills – ‘knowing how’ – 
and their rationale, as well as a few specific 
examples of useful approaches.

Types of talk

As teachers, we know that children can be 
talkative and classrooms can be chatty places but 
sometimes we may have concerns about how 
productive or focussed the children’s talk is. 

Particular types of talk promote learning. In 
Thinking Voices – the work of the National 
Oracy Project (1992), Douglas Barnes 
suggested two broad categories of talk for 
learning which teachers have found useful:

- Presentational talk
- Exploratory talk

Talk can also promote inclusion, reflecting 
children’s diverse language communities and 

Experienced teachers are well-versed in 
strategies for using talk effectively in the 
classroom but some basic principles are always 
worth repeating, considering and developing. 

What follows is a reminder of some techniques 
and their rationale, as well as a few specific

disciplinary contexts for assessing children’s understanding.

Presentational talk is the product, whilst 
exploratory talk reflects processes of learning. 
In his book Speaking and listening: never a better time, 
Neil Mercer identified useful teaching 
techniques which enable children to become 
effective and reflective speakers and listeners. He 
called these ‘the teacher’s toolkit’ for talk, 
observing that when teachers continually rephrase 
and respond to children’s oral language, children 
emulate the teacher’s higher-level model of talk. 

The teacher’s toolkit involves responding to what 
children say and describing the shared classroom 
experience through a range of oral techniques:

- Confirmation: ‘Yes, that’s right…’
- Repetition: ‘You’ve told us that “the ice-cap 
melted gradually”…’
- Reformulation: ‘Over millions of years, the ice-
cap diminished…’
- Elaboration: ‘Many scientists hypothesise that 
global warming is responsible for this…’
- We statements: ‘We’ve researched some 
evidence for this…’

Sharpen up your questioning skills

Knowledge of the range of question types provides 
a powerful tool for personalised learning and 
ensuring that all children can be drawn into class 
and group discussions. In this example, a group of 
teachers considered how a great work of art – such 
as Velasquez’s Las Meninas – could be used to 
generate different types of questions. There are 
opportunities for literal, closed questions.

I couldn't bear to have pigs.

And what purposes might pigs serve?

Create contexts for talk

Opportunities for talk are opportunities for active learning and children need repeated experiences to practise speaking and listening. Incorporate talk into your planning, enabling children to talk in pairs and in groups, in a range of curriculum areas. These moments can be as brief as one minute (‘talk to the person next to you – what do you think will happen next?’) and as long as a piece of string (‘discuss in your groups until you agree how the story should end.’). You can observe how such activities invite children to use exploratory language and justify their reasons, using phrases such as ‘I think… because… so that…’ and what this reveals about their thinking and understanding. Such opportunities can involve problem-solving, collaborative drafting and writing, experimenting, designing and crafting. Children also need to have a clear understanding of why they are talking, for example, to solve a puzzle, to create an image, to arrive at a conclusion, or to communicate to an audience.

Drama

Process drama can offer powerful contexts for developing children’s spoken language. A particular effective approach is based on the work of Dorothy Heathcote, Gavin Bolton and Cecily O’Neill (see Drama for Learning by D. Heathcote and G. Bolton) and involves the teacher working in role alongside children. When a teacher assumes a role she can model, channel and extend language in a range of fictitious drama contexts. Such an approach can afford children the opportunity to reason, challenge, persuade and negotiate in role.

For example, Waddell and Oxenbury’s multi-layered picture book Farmer Duck draws on aspects of Orwell’s classic Animal Farm and has potential for use in a Nursery or a Year Six Class. The plot presents the unfair treatment of animals and the eventual displacement of the original farmer. However, drama allows you to explore situations with children before, during and after those presented in the story. Here are some possibilities.

1. Go into role with the children as the unfairly treated animals. In this situation you may choose to discuss plans, reasons with the powerful farmer, or persuade others to take the dangerous course of revolutionary action and be prepared to justify such action to others.
2. Take on the role of the farmer and argue against attempts at negotiation by the animals.
3. Choose to go sideways into the story and assume the roles of neighbouring farmers/animals reacting to the news of the farmer’s eviction.
4. Go forwards in time to consider the problems of farm management by the victorious animals. While animals such as cows have an obvious economic contribution to make – just what purposes might pigs serve?

As these dramatic situations develop, the language in use serves different purposes. Note the following example where a reception child has taken on the role of the farmer’s mother. She has abdicated her responsibilities for his behaviour and is attempting to persuade a hostile audience that the unhealthy diet she provided for him as a child was justified.

Anna [Spoken with an air of resignation and in a persuasive tone] I couldn’t bear to have him whining at me after dinner so I just had to give him it.

Teacher Does he whine a lot? …When your son whines you let him have what he wants? Anna If they whined a lot of times…well I don’t want a whiner at dinner …because then it would be a really waste what you have just cooked for them and that. So you just have to give him what they have… or otherwise you waste it.

In every dramatic situation, there is the need for talking for a range of social purposes. Children are used to this demand from their early play experiences. You have only to observe a themed home corner such as a hospital to hear children complaining, diagnosing, reassuring and prescribing. Drama capitalises on these early play experiences and enables teachers of children at any age to focus and extend the use of talk in the classroom. Such talk can provide authentic pathways and reasons for a range of writing (for example, in the example above, the children could go on to write healthy recipes and shopping lists for the mother and her farmer son).

In conclusion, it is important that children themselves have opportunities to reflect on the value of talk. This Year 5 boy commented on how talk helps him to think:

I get to understand their ideas as well as mine, so I can get a mixture of both ideas, instead of just having mine.

(‘Boys on the margins’ by Safford et al, 2004)
