Ecological habits of mind in design:

EDUCATION

LEARNING: At a simple level, the process through which new knowledge, values and skills are acquired. At a deeper level, it involves a ‘movement of mind’.

- Senge, 1990

The difficulty lies not in the new ideas, but in escaping from the old ones ...

- John Maynard Keynes
Ecological habits of mind in design:
EDUCATION

A new way of thinking

Reframing (Problem solving)
Synthesis (Analysis)
Holism (Reductionism)
Multiple influences (Closed cause-effect)
Integrative (Atomism)
Extension of boundaries (Narrow boundaries)
Critical subjectivity (Objectivism)
Pluralism / duality (Dualism)
Rational / non-rational (Rationalism)
Uncertainty, ambiguity (Determinism)

Stephen Sterling, 2009
**Ecological habits of mind in design:**

**EDUCATION**

**ECODESIGN**

*a focus on outcomes*

---

The current boundaries of designing *(within [design] limits; but without ecological limits)*
**Ecological habits of mind in design:**

**EDUCATION**

**ECODESIGN**

a focus on outcomes

---

**SUSTAINABLE INNOVATION**

a focus on process

---

The current boundaries of designing (within [design] limits; but without ecological limits)

Designing in a sustainability context that connects everything (without limits; but within ecological limits)
Ecological habits of mind in design: EDUCATION

Stephen Sterling, 2009:

**Content and/or skills emphasis.**
Easily accommodated into existing system. Learning about change.

**ACCOMMODATIVE RESPONSE - MAINTENANCE**

**Capacity building and action emphasis.**
‘Living’ and experiential curriculum. Sustainable institutions as permeable learning communities. Learning as change.

**TRANSFORMATIVE RESPONSE - ENACTMENT**
Unsustainability

The emphasis is on reducing the environmental [& social] impacts of what we do today

Ecological habits of mind in design:
RESILIENCE

UNsustainability
The emphasis is on reducing the environmental [& social] impacts of what we do today

CREATING sustainability
The emphasis is on rethinking our goals and visioning different futures and ways of getting there

Ecological habits of mind in design: 
RESILIENCE

Quick Fixes don’t solve Fundamental Flaws

J Ehrenfeld *Beyond Sustainability* - a Manifesto
http://www.worksavvy.ws/BeyondSustainability.pdf
Ecological habits of mind in design: RESILIENCE

In transition to the ‘long view’ we need to examine the very roots of our culture.
Ecological habits of mind in design: RESILIENCE

In transition to the ‘long view’ we need to

- embrace profound changes in individual behaviour
- fundamentally shift to different concepts of work and reward
- create holistic systems and structures of governance

Examine the very ROOTS of our culture
We know what we should do but we don’t think it is urgent or relevant to us –
creative interruptions are required to shift societal perceptions and goals.
ordinary minds everyday

We know what we should do but we don’t think it is urgent or relevant to us –
creative interruptions are required to shift societal perceptions and goals

Designers have the capacity to redraw the story for society; to revision, to make real other, viable and more sustainable lifestyles ...

... to REDESIGN concepts and ways of thinking; technology and tools; institutions and infrastructures
Ecological habits of mind in design: RESILIENCE

- Alternative Approaches to Designing
- Material Journeys
- Labour & Economic Development
- Impacts of Design
- Consumption & Product Use

Ecological impacts; Resource nature & flows; Distances
Human health & Well-being; Needs
How much STUFF? Perceived 'value' / purpose, Real costs, Life stories

- Co-creation
- Activism
- Ownership

Resources, Fitness for Purpose, En-durability

Lunar-Resonant Streetlights
by the San Francisco’s design collective Civil Twilight

Streetlights respond to ambient moonlight, dimming and brightening each month as the moon cycles through its phases. On clear nights they turn off completely saving up to 80% of energy used in street lighting.

Metropolis, May 2007: 158-161
Experiencing a different scale

nurturing ecological habits of mind
IN DESIGN

‘Why is being heard so healing?

I don’t know the full answer to that question, but I do know it has something to do with the fact that listening creates relationship.

We know from science that nothing in the universe exists as an isolated or independent entity. Everything takes form from relationships, be it atomic particles sharing energy or ecosystems sharing food.

In the web of life, nothing lives alone.’

Meg Wheatley Turning to one another: simple conversations to restore hope to the future: 89 (2002)
