Ecological habits of mind in design:

EDUCATION

LEARNING: At a simple level, the process through which new knowledge, values and skills are acquired. At a deeper level, it involves a ‘movement of mind’.

- Senge, 1990

The difficulty lies not in the new ideas, but in escaping from the old ones ...

- John Maynard Keynes
A new way of thinking

Reframing (Problem solving)
Synthesis (Analysis)
Holism (Reductionism)
Multiple influences (Closed cause-effect)
Integrative (Atomism)
Extension of boundaries (Narrow boundaries)
Critical subjectivity (Objectivism)
Pluralism / duality (Dualism)
Rational / non-rational (Rationalism)
Uncertainty, ambiguity (Determinism)

Stephen Sterling, 2009
Ecological habits of mind in design:

EDUCATION

ECODESIGN
a focus on outcomes

The current boundaries of designing (within [design] limits; but without ecological limits)
Ecological habits of mind in design:

**EDUCATION**

ECODESIGN
a focus on outcomes

SUSTAINABLE INNOVATION
a focus on process

The current boundaries of designing (within [design] limits; but without ecological limits)

Designing in a sustainability context that connects everything (without limits; but within ecological limits)
**Ecological habits of mind in design:**

**EDUCATION**

Stephen Sterling, 2009:

**Content and/or skills emphasis.**
Easily accommodated into existing system.
Learning about change.

**ACCOMMODATIVE RESPONSE - MAINTENANCE**

---

**Capacity building and action emphasis.**
‘Living’ and experiential curriculum.
Sustainable institutions as permeable learning communities.
Learning as change.

**TRANSFORMATIVE RESPONSE - ENACTMENT**

---

Unsustainability

The emphasis is on reducing the environmental [ & social] impacts of what we do today

**E c o l o g i c a l h a b i t s o f m i n d i n d e s i g n:**

**R E S I L I E N C E**

**U n s u s t a i n a b i l i t y**
The emphasis is on reducing the environmental [& social] impacts of what we do today

**C R E A T I N G s u s t a i n a b i l i t y**
The emphasis is on rethinking our goals and visioning different futures and ways of getting there

J Ehrenfeld *Beyond Sustainability* - a Manifesto
http://www.worksavvy.ws/BeyondSustainability.pdf
Ecological habits of mind in design: RESILIENCE

In transition to the ‘long view’ we need to examine the very ROOTS of our culture
Ecological habits of mind in design:
RESILIENCE

In transition to the ‘long view’ we need to

- embrace profound changes in individual behaviour
- fundamentally shift to different concepts of work and reward
- create holistic systems and structures of governance
Ecological habits of mind in design: RESILIENCE

ordinary minds everyday

We know what we should do but we don’t think it is urgent or relevant to us – creative interruptions are required to shift societal perceptions and goals
ordinary minds everyday

We know what we should do but we don’t think it is urgent or relevant to us – creative interruptions are required to shift societal perceptions and goals

Designers have the capacity to redraw the story for society; to revision, to make real other, viable and more sustainable lifestyles ...

... to REDESIGN concepts and ways of thinking; technology and tools; institutions and infrastructures
Ecological habits of mind in design:
RESILIENCE

- Alternative Approaches to Designing
- Material Journeys
- Labour & Economic Development
- Consumption & Product Use
- Impacts of Design

Co-creation
Activism
Ownership

Resources
Fitness for Purpose
Endurability

Ecological impacts; Resource nature & flows; Distances

Human health & Well-being; Needs

How much STUFF? Perceived 'value' / purpose Real costs Life stories

Flock knitwear:

a line of knitwear where the fibers can be traced back to specific animals (sheep and goats) and the clothing tag provides information about the animal and its location and breeding.

by Nancy Nowacek *From Farm to Closet*, Metropolis, December 2006: 52

Designer: Christien Meindertsma

Lunar-Resonant Streetlights
by the San Francisco’s design collective Civil Twilight

Streetlights respond to ambient moonlight, dimming and brightening each month as the moon cycles through its phases. On clear nights they turn off completely saving up to 80% of energy used in street lighting.

IN DESIGN

‘Why is being heard so healing?

I don’t know the full answer to that question, but I do know it has something to do with the fact that listening creates relationship.

We know from science that nothing in the universe exists as an isolated or independent entity. Everything takes form from relationships, be it atomic particles sharing energy or ecosystems sharing food.

In the web of life, nothing lives alone.’

Meg Wheatley Turning to one another: simple conversations to restore hope to the future: 89 (2002)
