characterised response to the use of the OU’s innovative learning technologies. The OU developed an initiative to returner’s (returners) support to mainstream higher education. The returners were drawn from a wide variety of STEM subjects who had not returned to work for a career break. This resulted in the funding of a special UK-wide initiative supported by the OU’s Employability and Returners’ (returners) initiative. The initiative is being implemented under the auspices of the OU’s career services. Funds from the EU Equal Opportunities programme enabled additional support activities to mainstream the returners’ initiative. The returners were drawn from a wide variety of STEM subjects who had not returned to work for a career break. This resulted in the funding of a special UK-wide initiative supported by the OU’s Employability and Returners’ (returners) initiative.

The design of the course was developed in the UK’s innovative learning technologies. The OU developed an initiative to returners’ (returners) support to mainstream higher education. The returners were drawn from a wide variety of STEM subjects who had not returned to work for a career break. This resulted in the funding of a special UK-wide initiative supported by the OU’s Employability and Returners’ (returners) initiative. The initiative is being implemented under the auspices of the OU’s career services.
