Social isolation and loneliness in people aged 55 and over in Milton Keynes: the way forward

Jane Palmer, Age UK Milton Keynes
Shailey Minocha, Caroline Holland, Catherine McNulty and Duncan Banks, The Open University, UK
23rd February 2016

Effects of social isolation on individuals

- individuals lacking social contact carry a health risk equivalent to smoking up to 15 cigarettes in a day
- social isolation is more harmful than not exercising and twice as harmful as obesity
- social isolation puts older adults at greater risk of early mortality, dementia, suicide and cognitive decline
- individuals are at greater risk of developing low self-esteem, depression and loneliness
Societal impacts of social isolation

- increased use of health and social care services, higher number of emergency admissions and GP consultations, slower discharge from hospitals
- pressure on financial resources and health services
- deprives communities from their knowledge and experience, and the roles that they could play in communities and neighbourhoods
- ‘healthy’ older people are more likely to be volunteers and to provide informal care - this increases social connectedness and alleviates pressure on the health services

Risk factors for social isolation

- low income
- unemployment, redundancy, retirement
- not having digital skills
- families being globally distributed
- being widowed or divorced
- being in a caring role
- losing the ability to drive
- language barriers
- insufficient access to resources (information, transport)
Risk factors in Milton Keynes

- rapidly ageing population
- diverse and growing population of BAME groups
- pace of development in MK
- crucial ongoing transport issues
- neighbourhood changes - commuter town, short-term occupancy
- built environment - centre, housing estates, satellite villages

Challenges for the community

- identifying older people who may be vulnerable
- communicating information about local support and initiatives
- diverse age range, needs and preferences – from 55 years to 90+
- paying attention to events in the lives of older people in communities without ‘intruding’
- constant change in the funding regime – effects on local libraries, transport, continuity of the initiatives
Challenges for older people

- preparing for one's future – by building and nurturing a ‘personal convoy’
- being willing to be helped by others
- being open to new connections and friendships
- being open to new services and interests – e.g. getting online
- awareness of local initiatives and support groups

Possible solutions

- One-to-one interventions
  ◦ visits by community home visitors
  ◦ regular phone conversations
  ◦ visits by neighbours – e.g. Casserole Club
- Group interventions
  ◦ e.g. Men in sheds, lunch clubs, coffee mornings
  ◦ inter-generational initiatives – e.g. learning to be online
  ◦ e.g. walking groups, local history society
- Wider community and neighbourhood interventions
  ◦ encouraging older people to be volunteers
  ◦ co-design the programmes with older people - e.g. neighbourhood watch programmes
  ◦ age-friendly design of spaces – local neighbourhoods, city centre
What could be done in Milton Keynes?

- What are our priorities? (for quick and effective results)
- Designing age-friendly neighbourhoods and city-spaces (following the example from Manchester)?
- Better utilisation of community spaces – libraries, city centre?
- How could we take help from corporates?

What can I (or we) do?

- To reflect and think about our individual roles and how we could help?
