Compression, convergence and conviviality

the contribution of new technologies to developments in
radio from the 1980s

Professor Chris Bissell
The Open University, UK

chris.bissell@open.ac.uk

Old paradigm

- Broadcasting
- Limited bandwidth
- Listener response:
 - Letters
 - Phone-ins
- Other media
 - Print (*Radio Times, Listener ...*)

New paradigm

- Narrowcasting
- Flexible bandwidth
- Listener response:
 - Letters
 - Phone-ins
 - Email / texting
 - Social media (facebook, twitter, chat)
- Other media
 - Print (*BBC Magazines ...*)
 - Websites
 - Images
 - Videos

Discussion points

- Convergence of audio and video (including telephony)
- Role of standards
- Compression technologies
- Military & civil technologies
- Social aspects
 - Communication between audience, content developers and broadcasters
 - Conviviality

Standards

- MPEG suite
 - Moving picture experts group, established in 1988
 - Digital TV
 - mp3: MPEG-1/2 audio layer III
 - Digital analogue broadcasting
 - Now integral part of smart phones
- Advanced Audio Coding (AAC)
 - Default for *YouTube*, *iPhone*, etc
 - DAB+ (not forward compatible with MPEG DAB)
- Military / civil links

Military / civil links

- Coding
 - Development of CDMA
 - Uses pseudo-random codes instead of time- or frequency multiplexing
 - Military: security
 - Civil: noise resilience and bandwidth efficiency
- Hardware advances
- 3G: wireless telephony, Internet access, video calls and mobile TV technologies ; IUT specificationj IMT-2000
- 4G: originally envisioned by *DARPA*; standardised 2008
 - Uses OFDMA rather than CDMA
 - IP-based

Compression

format

*sampling
frequency*

*quantization
/ bit rate*

*file
size*

WAV	192 kHz	24 bits	329 MB
	96 kHz	24 bits	164 MB
	88.2 kHz	24 bits	151 MB
	48 kHz	24 bits	82.4 MB
	44.1 kHz	24 bits	75.7 MB
	44.1 kHz	16 bits	50.4 MB
MP3	44.1 kHz	320 kbps	11.4 MB
	44.1 kHz	256 kbps	9.15 MB
	44.1 kHz	192 kbps	6.86 MB
	44.1 kHz	128 kbps	4.57 MB
	44.1 kHz	92 kbps	3.43 MB

How is it done?

- Human hearing characteristics
- Frequency compression
- Temporal compression
- Enormous file size reductions

Compression

format

*sampling
frequency*

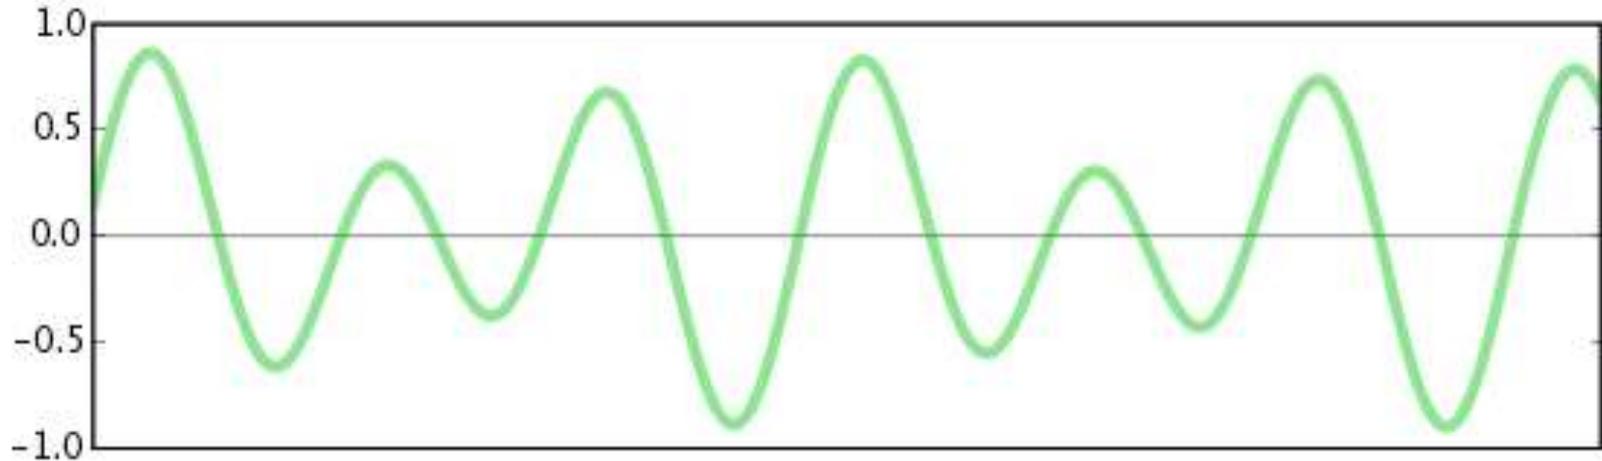

*quantization
/ bit rate*

*file
size*

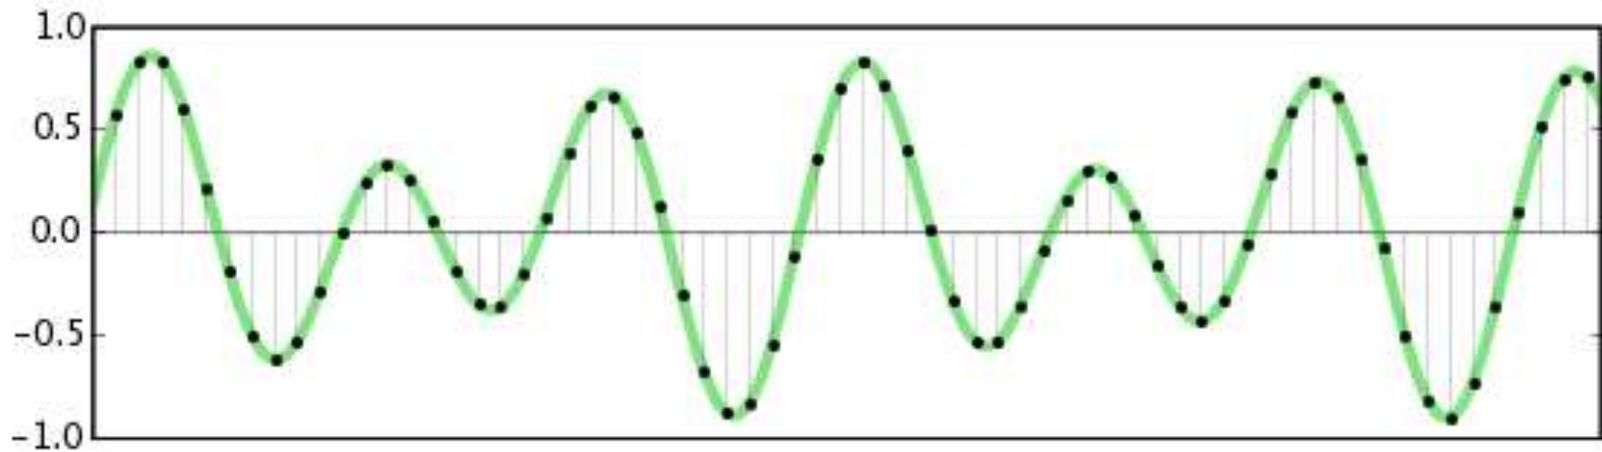

WAV	192 kHz	24 bits	329 MB
	96 kHz	24 bits	164 MB
	88.2 kHz	24 bits	151 MB
	48 kHz	24 bits	82.4 MB
	44.1 kHz	24 bits	75.7 MB
	44.1 kHz	16 bits	50.4 MB
MP3	44.1 kHz	320 kbps	11.4 MB
	44.1 kHz	256 kbps	9.15 MB
	44.1 kHz	192 kbps	6.86 MB
	44.1 kHz	128 kbps	4.57 MB
	44.1 kHz	92 kbps	3.43 MB

Digitisation

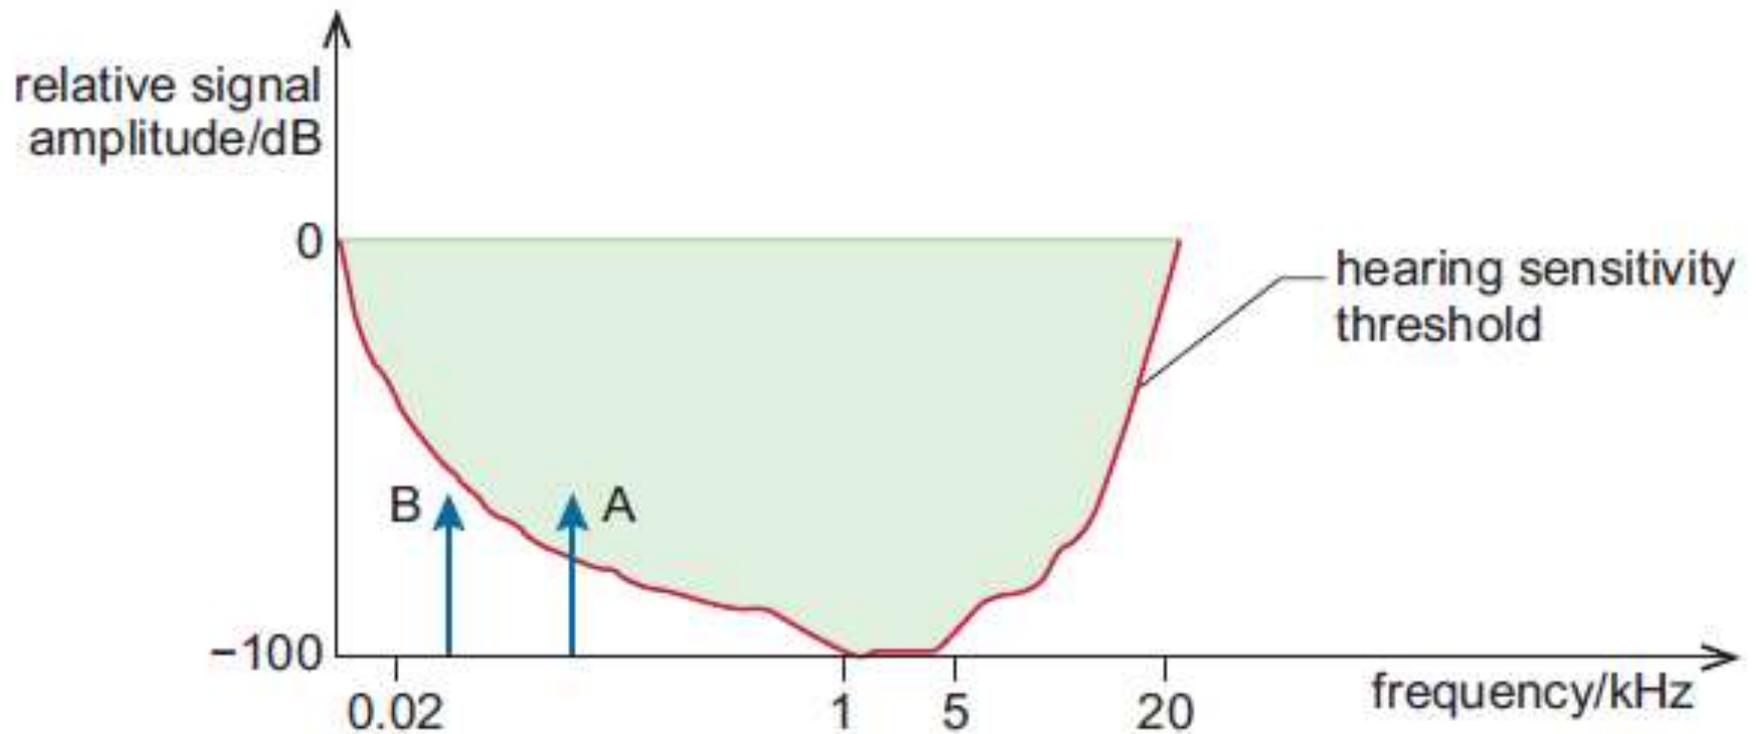

analogue – transmit a continuous replica of original

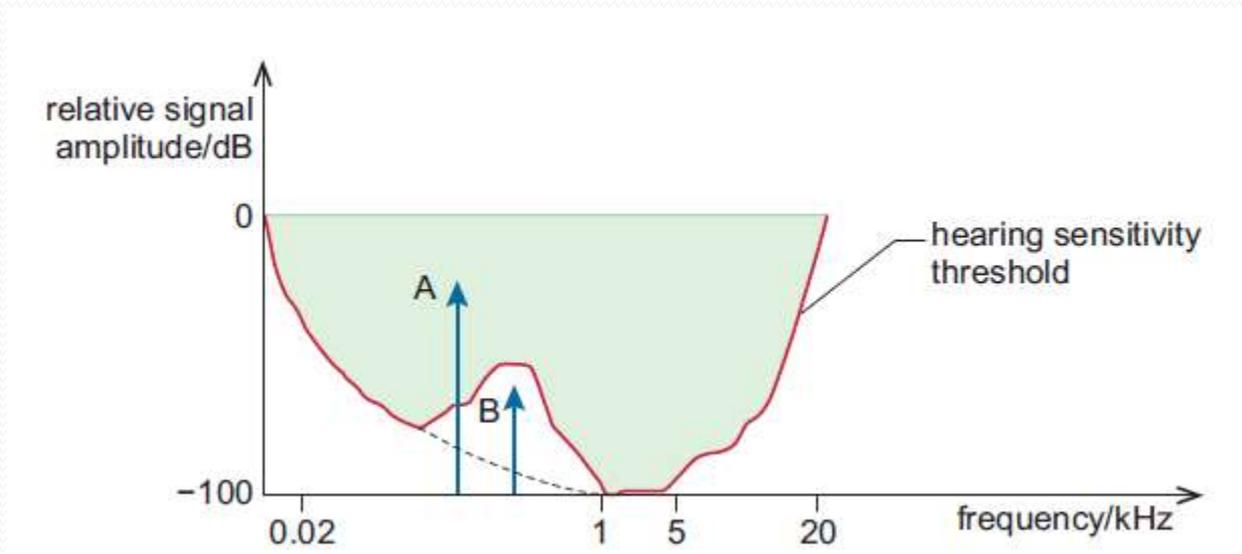

digital – transmit a series of numbers (sampling rate depends on frequencies)

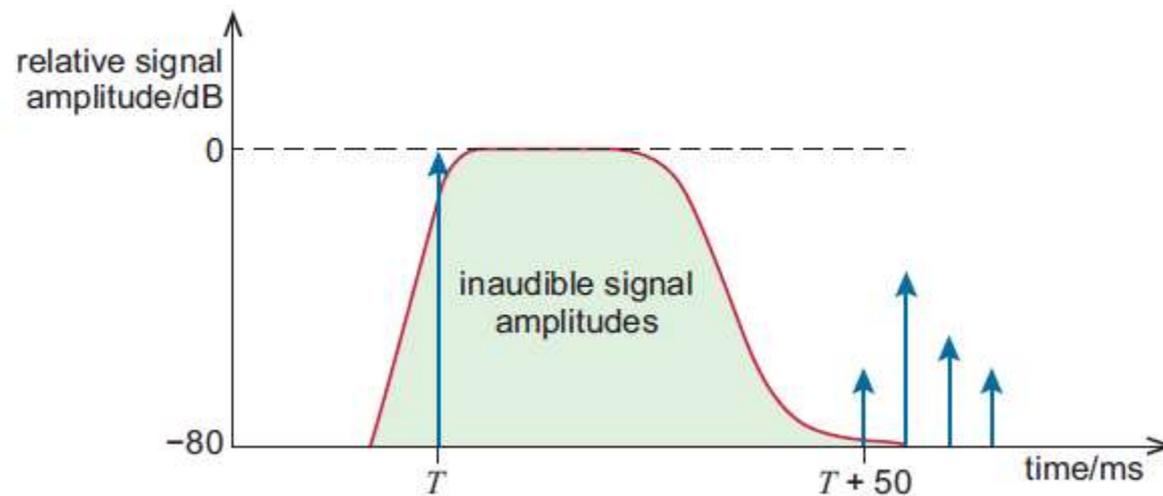

Hearing threshold

Frequency masking

Temporal masking

Mp3: a cultural artifact?

- technological artifacts ‘embody specific forms of power and authority’ (Winner, 1986)
- mp3 an attempt to solve the problem of exchangeable formats across segments of the media industry
- may require particular social and cultural systems of both intellectual property and listening
- ‘works for’ and is ‘worked on’ by a host of people, ideologies, technologies and other social and material (Sterne, 2002)
- ownership – like digital images – rather than simply consuming!

Convergence

- In place of the old system is a new one, which has been called "convergence culture."
- Encompassing the hybridization of technologies and the collaboration of corporations on one hand, convergence also highlights the penetration of the audience itself into the spheres of production, promotion, and distribution.
- Many academics, commentators, and fans themselves see convergence culture as an ultimate victory ...
- But is it just free labour?

Conviviality and on/off-line (examples from BBC, but common to many broadcasters)

- Podcasts
- Videos
- Streaming and downloads
- Message boards
- Twitter
- Facebook

Some reasons

- Commonality of technologies
 - Web
 - MPEG / mp3 / DAB
 - MPEG video / DTV
- User knowledge
- Transferable user skills

Theresa May will be the new Prime Minister replacing David Cameron as Tory leader. Adam Fleming from BBC Daily Politics & Sunday Politics is answering your questions. What do you want to know? #FacebookLive

Conclusion

- Audio compression based on psychoacoustic models has led to enormous file compression
- Storage requirements and transmission rates improved
- Time is shifted (catch-up audio and video)
- Social change
 - Social media
 - Citizen journalism / AV production
 - Conviviality and convergence
