Google Expeditions

- Photospheres (360° view)
- Three-dimensional representation
- Real places or simulations
- First person exploration

Our research goals

- Whether and how virtual reality-based Google Expeditions (GEs) can be integrated in the Science curriculum (classrooms)
  - Teaching science concepts and phenomena
  - Support inquiry-based learning and students’ curiosity
- Whether and how virtual reality can support CPD of teachers
- Recommendations for the user interface design of GEs
Our research goals

- Whether and how virtual reality-based GEs can support physical field trips

Pre-physical field trip  ➔  During a Physical field trip  ➔  Post-physical field trip

How you could help us?

- Trying it out today (Demo)
- Thoughts on fit with the curriculum and with physical fieldwork
Think of one of the difficult concepts in Science:

How could Google Expeditions (or Virtual Reality, in general) help you to teach that concept?

How could Google Expeditions support the development of fieldwork skills?
How could you use Google Expeditions before a physical field trip?

For which scenarios would you use Google Expeditions during a physical field trip?
Group discussion

Post-physical field trip

How could you use Google Expeditions after a physical field trip?

Group discussion

What are the challenges that you would face in integrating Google Expeditions in your curriculum?
