Using Metadata from the Institutional Repository for the REF Submissions

System

- **ORO**
  - ORO is an EPrints Institutional Repository managed by Library Services

- **ORO EPrints REF Plug-in**
  - Allows assignment of Units of Assessment and automated QA

- **Research Profile Form**
  - Is an in-house system for selecting publications

- **Data held and maintained in two systems!**

Actors

- **Researcher**
  - Data at the beginning of the lifecycle is user generated

- **ORO Team**
  - Data good enough for the repository user may not be good enough for the REF submission e.g. Sentence case v. Title Case

- **OU REF Panel**
  - OU Ref Team manage the submission, the OU REF Panel decide on which publications to submit

Audience

- **Repository user**

- **Repository user**

- **OU REF Panel**

- **HEFCE**

Metadata

- **EPrints schema**
  - Data from ORO extracted from an institutional triple store at data.open.ac.uk

- **Open linked data**

- **HEFCE REFxml**
  - HEFCE data requirements were different to the EPrints schema. These requirements have been integrated into the repository architecture

- **OAI-PMH compliant**

- **HEFCE REFxml**
  - Represented using the Bibliographic Ontology (bibo)
