Supplementary Data 2: grounded-type analysis ‘mind map’ created by project team to support interpretation and analysis (note: diagram was for heuristic purposes only to aid analysis. Underlined observations are linked across themes by dotted lines).

- **CAPACITY BUILDING**
  - support from local government for vocational training
  - local knowledge for adaptation
  - role of technology

- **COMMUNICATION**
  - communication and role of civil society organisations
  - need for appropriate communication methods

- **POLICY & FUNDING**
  - whole range of policies (active and passive)
  - governmental policy support
  - effective support

- **CLIMATE CHANGE IMPACTS**
  - agricultural production depends on weather - low productivity
  - ecosystem services impacted by climate change

- **ENVIRONMENT**
  - ecosystem services - protected forests
  - weather conditions changing

- **LIVELIHOOD CHANGE**
  - changes in livelihood in the context of climate change
  - who really benefits from livelihood changes?

- **COMMUNITY**
  - role of private sector
  - generational dynamics

- **GENDER**
  - changing gender relations and dynamics
  - participation of women in government (to be leader)

- **RESILIENCE**
  - adaptation of agriculture and aquaculture
  - resilience varies from community to community
