SpotLight on: William Wilberforce

March 2007 marks two hundred years since a Parliamentary Bill was passed to abolish the slave trade in the then British Empire, but how much do you know about William Wilberforce? Read more...
openlearn research

• Producing:
  – How to transform for open content?
  – What tools do we need?
  – Can we bring in content from the world?
  – Do we give new life to things the world values?
• Learning:
  – Do we have users?
  – Can we reach the world?
  – What do they do?
  – Does anyone learn anything?
Activity system (Engeström)
Design view

Tools: Workshops/meetings/guidelines/advice

Subject: Academic

Object: Open content

Rules: Models/Suitability/Research/Faculty satisfaction

Community: Open University/Colleagues/Hewlett/interested world

Division of Labour: openlearn team/Volunteers
Implementation view

- Tools: XML editor, Moodle, Pro-forma, Transformation forms, eRoom, learningspace, labspace
  - Subject: Academic
    - Division of Labour: Academic team, Media team, External editors, Contracted staff, Faculty liaison, OU staff, Volunteers
  - Object: Openlearn unit
    - Community: openlearn team, wider OU, World, Collaborators
    - Rules: Integrity Model, Guidelines, Proposal targets, Steering group
Analysed producer contradictions

- Academic team/ Media team and OU staff – who has final sign off
- Users- XML Editor
- Models for unit production
- Proposal targets
- Remove the sign-off process: improve after release
- Add in other formats and models
- Include new factors in the targets
Does the analysis help?

- Behind the scenes: based on observation
- Presentation tool to others: feedback and refinement
- Method for recording factors: neutral view
- Applied in other situations and projects
- Remains to be validated for this case
openlearn research

• Producing:
  – How to transform for open content?
  – What tools do we need?
  – Can we bring in content from the world?
  – Do we give new life to things the world values?

• Learning:
  – Do we have users?
  – Can we reach the world?
  – What do they do?
  – Does anyone learn anything?
How we will work with others

• Collaboration with Brazil:
  ⇨ translation of openlearn units
  ⇨ cross-cultural issues (context, language, institutional discourses and policies)
  ⇨ Two phases: implementation 1 and 2
  ⇨ Method: drawing on ethnography and action research
  ⇨ Disruptive?
  ⇨ Formal and informal learning
Summary

Activity theory can provide a useful mechanism to understand complex practices within openlearn and help us to identify contradictions;

The challenge for us is to balance applied research (fast feedback) and academic research in order to develop a greater understanding of the field.
