‘As if I have met you’

As if I have met you

...I get a feeling of meeting you face-to-face...even though I engage with avatars, I am aware that behind them there is a real person...
I think students can’t deal with the whole space. Each learning scenario works if it is task oriented. Students obviously would need to know where to be and what is expected of them.

Geography and science education

Inquiry

Virtual field trips

Learning through simulations
Empirical research

Lessons in schools
- students (n=549)
  - year 4 to year 11
- science (n=11)
- geography (n=9)

Interviews
- science teachers (n=11)
- geography teachers (n=9)
- curriculum experts (n=6)

Workshops
- field workers (n=19)
- educators (n=55)

Class preparation

Inquiry-based learning activity sheet
Affordances

- 360-degree visual authenticity
- Emphasis and in-situ contextual information
- Single-user handling
- 360-degree navigation
- First-person perspective
- Synthesis
- 3D view
- Simulation
- Visualisation
Experiencing the invisible

Real places

“The virtual reality helped me because I could see for myself what was happening without having to imagine it.”
Learning through simulations

Simulations

the animation was very realistic; therefore, I could take more knowledge away from the lesson [...] these images can [...] help me explain about the respiratory system in a much larger amount of detail.
Local to global – and – global to local

It helped me to understand the Chilterns is an area of natural beauty compared to some places in the world. It helped me to feel more caring about the Chilterns.
Employability

“A set of capabilities and achievements that support students in developing their careers, raising their aspirations and enhancing their contribution to society.”

The Open University Student Employability Policy Statement
Virtual reality and employability

Virtual reality

- Awareness
- Workplace usage
- Learning and skills development
Virtual reality and employability

Virtual reality

awareness

- awareness of virtual reality technologies

workplace usage

- design and prototyping
- risk-assessment training
- Continuing Professional Development
- emergency and natural disaster management training
- treatment of depression, loneliness, dementia

learning and skills development

- sensitising to environmental issues
- Interviewing; team-working skills
- healthcare education; forensic science training
- teaching
The future
