MOBILE FUTURE IN FOCUS 2013

THE MOBILE CONSUMER
What Devices Do Our Students Use? (Jan 14 update)

This updates Tech Note 4 (Oct 12), using newer and more detailed data from IT on student VLE usage.

Study Devices

Responses from 697 OU students who completed LTS's second ICT survey in Summer 2013 showed that:

- Each student has an average of 2.3 devices which they use for OU study purposes (2012: 2.2)
- 86% of first devices are PCs (2012: 95%) and 71% of these are laptops (2012: 64%)
- 31% share their first device with other family members (2012: 34%)
- 5% use a work, college or public computer as their first device (2012: 5%)
- 53% of second devices are ‘mobile’ (phones or tablets) (2012: 44%)
- 9% use a phone or tablet as their primary device for study (2012: 5%)
- 98% connect via home or mobile broadband (2012: 97%) and 86% connect at >2Mbps (2012: 80%)
- Win 7 is the most popular OS (41%) and Chrome (latest version) is the most popular browser (23%)

Platforms and Browsers

The following information is based on visits to any VLE site by unique student and device combinations. This means a student using the VLE three times in a month on a single device would count as one visitor, making three visits; a student visiting twice on their PC and once on a tablet would count as two visitors making 2+1 visits. Any small inconsistencies in numbers are due to the exclusion of minor device types.

VLE Visitors by Browser Type

VLE Visitors by Mobile Device Type

VLE Visitors by Device Category

VLE Visitor Presence by Device Category (1-30 Nov 13)

The information from the LTS Technical Learning Group aims to provide early warning of any possible development and support issues. It is not intended to sit across detailed or authoritative guidance or policy that may follow from these data.
Student device usage & mobile trends
Monitoring and reporting high-level usage by student/browser and device/platform

Addition of device autodetection in Summer'08

Some switching of views (to desktop-like) persists

mobile support microsite
by Rachel Thomas

Wednesday, 25 November, 11:45

Just to note that the new area on 'Skills for 21st Century' has been set up to link through to the different areas of guidance, advice and support available.

Later on, it will be used as part of publicity materials, furnishing students with m.open.ac.uk

While tablet experience similar to desktop, still a constrained Mobile Operating System
Mobile support in Learning Systems now mainstreamed and updated in parallel.
Mobile web approach on Qualifications
OU Staff demonstrator - Mobile VLE

Included below the menu is a simple form to generate the URLs needed to force your mobile browser (or desktop *) to show a specific VLE module or workspace in the Mobile VLE view.

* Please note that in order for a desktop browser to give you a feel for how this looks, you normally need to resize the window so it is sufficiently narrow. This does not work well in MSIE - but is successful on Firefox, Safari or Chrome. The popup window used below uses typical mobile resolution.

Also note that the mobile render is only for Moodle websites that use the OU Study Planner view.

For further information on the evolution of the current Mobile VLE for the majority of students, and its future direction in VLE2, please view blog entries via: www.open.ac.uk/blogs/techtalk/2010/5/27 enrol

If you are viewing this page on a mobile phone that understands barcodes, you may like to scan this QR code which should launch the mobile version of this page.

For information, if students come through StudentHome mobile or directly to the VLE on a device, there is device detection in place, and a cookie set that should automatically show the mobile optimised view. This is likely to be the method increasingly used to enable other OU websites to become mobile-friendly.

As explained in a related IET Tech talk, now that more sites are in VLE2 then an additional button has now been added.

The screenshots below show a typical comparison between what is shown as an approximation through the popup and what would actually be seen on a mobile device. It might be useful to note that the desktop Safari browser and iOS are the closest match in terms of fonts and sizing, but other browsers (incl. on mobile devices) allow for more customisation over these options to suit the user.

Apps & OU Anywhere
Initial version created as ‘native’ specific apps for iOS & Android only.
Now cross-platform, more open ‘HTML5’ approach allowing enhancements
Staff use of OU Anywhere

Note that it may take an overnight process to add a module to your account.
Mobile collaboration? Nearly...
Available since Q4 2013
iOS & Android/Kindle Fire app available - Basic OU support only
[mobiles & tablets]
Try: Log in using your normal OU account via goo.gl/ZvE Ao
Download the Collaborate app as required [iOS/Android only]
Upcoming release(s)

Currently suitable for basic webinar format only - slides and appshare with voiceover and minor text/vote participation

Enhancing for more interactivity and moderation, including web tour, breakout rooms and video as well as multimedia

Full interaction on whiteboard unlikely/deferred at present

Viewing replays on mobile will become more automated with MP4 video and MP3 audio. Live playback not possible
Google Apps and group work
Google Docs upgraded to Drive

Shopping List

- Skim Milk - 1 gallon
- Celery - 1 bunch
- Carrots - 1 bag
- Squash - 1
- Pears - 5
- Tomatoes - roma (5)
- Potatoes - 5 lb bag

OU Annotate mobile

OU Annotate mobile allows you to bookmark and comment on OU websites using a tablet. Tablet-specific aspects of OU Annotate mobile are explained here. Refer to the general OU Annotate guidance for general instructions on how to use the manager and toolbar.

Bookmarks and bookmarks

A bookmark is a 'favourite' URL or 'internet-based shortcut' that is stored on a device. You can select it to view an area of the internet rather than typing the whole URL into a browser every time you want to visit the website.

A bookmarklet is like a bookmark but includes some programming (normally JavaScript) that extends its features and usually performs a function when selected. If you've used the OU Annotate toolbar on a desktop or laptop computer before, the bookmark that activates OU Annotate is in fact a bookmarklet.

OU Annotate mobile on smartphones

OU Annotate mobile is not suitable for small-screen, low-resolution devices like the majority of smartphones. Although it is possible to use OU Annotate on any smartphone, using the toolbar while trying to read or highlight text on a small screen is impractical. You can however use OU Annotate to bookmark content to read and annotate later when using a different device.

Some large-screen (~6 inch) high-resolution smartphones like the Galaxy Note series (sometimes called a 'large mobile device', phone-tablet or 'phablet') may be usable. However there may be issues with small 'touch zones' on these devices.

We therefore strongly recommend that OU Annotate mobile is used on tablet devices with displays at least 7 inches in size.
Future opportunities to try out & talk
Spring briefings & drop-ins

[ Opportunities to talk with **OU Live** team, being arranged by LTS Media for next few months ]
